To Whom It May Concern:

My shop has the Hunter GSP 9700 Road Force Wheel Balancer and the TC3700 Tire Machine and am very impressed with the function and service received.

We work on very sophisticated European vehicles and they place great demand on our equipment. We provide the highest level of service to our customers and both the machines eliminate vibrations and quickly spot tire problems.

The TC3700 has also made it much easier for our technicians to work with the special wheels packages and the run flat tires.

Sincerely,

Jim Smeltzer
Owner and President
