ATTENTION: Quentin Fanning

We are very pleased with the balancing technology of the Hunter Road Force Balancer /GSP9700 that we purchased back in February 2010! The car manufactures are coming out with vehicles with alot larger rims and tires then prior years. This machine does a great job of placing the right rim and tire on the vehicles after balanced, also the color printer for the final results to show the customer helps with the sale!

Our tire rotations and balances have tripled since all of last year so far! This also helps with alignments, tire sales, and front end work sales!

Thanks Hunter Equipment!
