

TIRE BARN

15 Virginia Drive, Tunkhannock, PA. 18657
570-836-5258

**Today, all the tire business faces the same dilemma:
New sizes, new wheels and more demanding customers.
I recently purchased a Hammerhead Road Force Balancer.
The first month of operation saved me approximately
\$ 1000.**

**I have always run my company on this premise: Save the
customer, for future sales even if you lose on this deal. In the
past if there was a ride complaint: I would replace the tire.**

**With the Hunter Equipment I can find out the real problem and
solve it. In my part of the country this usually means a bent
wheel. By matching the tire and wheel position we can maximize
Customer satisfaction with these products.**

**Finally the Hunter Balancers, with the Laser Beam takes the
guess work out of custom
wheel and single plane balancing. This is very important as more
& more O.E. Wheels require stick on weights.**

**I have been a satisfied Hunter user for over a decade. The
service back up is very reliable. I find all of your representatives
to be a pleasure to work with.**

SINCERELY
