RE: Hunter Road Force Balancer

We have been using our Road Force balancer for over a year now as our primary balancer. We use the Road Force function of the balancer 2-3 times a day. This has been helping us trouble shoot vibration issues along with a printout we can give to our customers.

In addition to solving vibration issues that come up. This balancer is saving us money in wheel weights. We have saved 29% in wheel weights with 3202 spins on our balancer.

I have included a print out of the weight savings screen.

Regards,

Steve Vollers
